# Tracks & Wheels Component Exchange Program

## How Our Exchange Program Works

Our customer issues a purchase order for the exchange component. The component is shipped to the customer who is then invoiced for the exchange and its core charge as separate line items. Upon receipt of the old core at Tracks & Wheels, it is inspected and the core credit amount is determined. The core credit is then issued and applied to the customer's account.

This program allows the exchange component to be shipped to our customer as soon as we receive the purchase order, thereby eliminating any down time, and in the end saving our customer time and money.

The returned component is then stripped down, rebuilt, tested and put through rigorous quality control inspections. After passing the final inspection the rebuilt component is then restocked in our Sudbury warehouse and is now available for resale.

For further details on our exchange program  
Contact Ron Pinard, Manager of Rebuilds  
Tel: (705) 566-5438 or by email
